

## THE LANGUAGE OF WALL STREET THE FUTURE JOURNAL

The world's first sight of Glosa, the language you didn't know you knew, was when we reported on it in the Spring 1992 issue of *Language Matters*. The worldwide publicity which sprang from that article has delighted the proponents of the language, Wendy Ashby and Ron Clark, based in Richmond, Surr

By Nicholas Bray  
Staff Reporter of The Wall Street Journal

Wendy and Ron are to launch a newsletter in spring 1994 for children who are learning Glosa and a Boston publisher is interested in producing a full colour Glosa book which may incorporate the work being done on fairy stories.

The language goes from strength to strength. Hopefully, if the European Parliament realise its potential Glosa can truly be called the language of the future.

Because of its simplicity, the basic 1,000 words can be learned in a few days. Glosa has interested many linguists and teachers. But in Atlanta, USA, Klaus Langkilde, is teaching Glosa to five classes of 'gifted' children at Chestnut Log Middle School. The language is so familiar, all of the words are from Latin and Greek, that much of it can be translated into English without any problem.

Adding insult to injury, Esperanto is facing competition from upstart rivals such as Glosa, a synthetic language based on Latin and Greek whose promoters claim it is easier to learn.

### New Scientist

About the language problem at scientific gatherings (This Week, 12 March): Glosa, the international language, is a possible solution. A modification of the late Lancelot Hogben's Interglossa, it is extremely easy to learn, rich and flexible.

Glosa 1000 has a vocabulary of 1000 Latin and Greek roots. These 1000 roots suffice for all kinds of even technical conversations. They are already being used every day in the media. We say that "Glosa is the international language you don't know you know."

Flexions are replaced by two-letter particles. For example, permutations of *nu* (now), *pa*, (*pas-st*), *fu* (future), and *du* (du-ration) provide for all the usual tenses. There are no parts of

speech. As in Chinese and increasingly in English, any word can act as noun, adjective or verb without undergoing any change.

Glosa is being taught in a number of schools and colleges in the US, Uganda, Tanzania and Taiwan. Last September in Brussels Wendy Ashby spoke about Glosa to about 150 people including MEPs and members of the European Commission staff in a discussion on "To what extent a planned language can contribute to the solution of communication and the language problem in the European Community."

East Anglian Daily Times.

### EUROPEAN MATTERS

And what is the effect on us commercially? Are we losing out by not speaking other languages?

#### DTI CAMPAIGN

The DTI certainly think so and are putting much time and effort into a "Languages for Export" campaign.

#### NEW LANGUAGE

Claimed as a quick and easy means of international communication, Glosa is an international auxiliary language which is apparently taught in schools as far away as USA, China and Africa, and is being considered by Euro MPs.

It is said to be the organisation of 1,000 Latin and Greek roots into an expressive language which can deal with the scientific and technical as

#### associationquest

Chestnut Log Middle School. She said that she was amazed by the enthusiasm of the students. "Some were even reluctant to leave the classroom for lunch."

Wendy and Ron hope that Glosa will become the official language for international agencies such as the United Nations.

#### Pluto e flexi

*De u lingua problema in sciencie unio (U-Ci Setimana, 12 Mars); Glosa, un internatio lingua, es u posi solutio. Id es u modifi de morta Lancelot Hogben Interglossa. Id es fo-facili de disci, pluto e flexi.*

*Glosa Mo-Kilo (Glosa 1000) uti solo 1000 Latin e Greko radi; qi sati pro panto speci, klu tekno, konversa. Pe uti mu panto di in holo Euro media. Na dice; "Glosa es un internatio lingua; tu ne ski; tu ski".*

*Plu flexio gene vice per plu brevi bi-litera verba. Exempla: Glosa face panto usuali tensi per plu permuta de nu (now) pa (pa-st), fu (fu-ture) e du (duration). Il es nuli plu parti de dice. Komo in Chinese e, kresce, in English ali verba akti nomina-, qalita-, alo klavi-verba, minus muta.*

*Glosa gene doci in oligo skodo e kolegi in US, Uganda, Tanzania, e Taiwan. Pa Septembra in Brusel, Wendy Ashby pa dice de Glosa a proxi 150 persona inklude plu MEP e Euro-Komisio ergo-pe, in diskusio: "A qo metri u ge-plana lingua pote kontribu a solutio de Kommunika e u lingua problema in Euro-Komunita?"*

**As Europe shuffles towards ever-closer union, GAVIN ALLEN looks at an invention which promises to bridge the linguistic gap**

#### TEACH YOURSELF GLOSA

not only give a fundamental knowledge of English but it is also an easy way into other Indo-European languages such as Spanish, French and German," he says.

**Pioneers talk way past the language barrier**

# PLU GRAMA

We have been thrilled by the number of enquiries we have received in answer to the articles in "Language Matters", "New Scientist", and the very brief but positive mention Glosa received on the front page of The Wall Street Journal. Below are extracts from two letters.

Here's a delightful someone who could express his sudden shock of enthusiasm for Interglossa only by a matching huge piece of irrationality!

"I first read the "Loom of Language" by Bodmer and Hogben 30 years ago, and since then whenever I find a copy of the Pelican "Interglossa" by Hogben I buy it.

I now have 7 copies!"

S.M., Leeds.

I shared your shock of delight when I first came across "Interglossa" in a book-shop in Salisbury, U.K. It made me drop all my other interests, in order to propagate Glosa.

You are very clever to have found seven copies. They are very rare, but judging from other enquiries they got very well distributed around the world. Friends discovered two copies for us. R.C.

"As a thirteen-year-old reader of "New Scientist" I enjoyed immensely your letter. I want to be a nuclear physicist when I am older, and I appreciate the necessity for communication across Europe and the rest of the world. However, I am bad at learning conventional languages, eg French.

Glosa seems to be a lot more logical than these, and indeed based on two languages I learn at school. They seemed to have little practical use except they help one to get at the meanings of many English words derived from them. E.H, Bucks.

You will find your knowledge of Latin and Greek vocabularies extremely useful if you decide to take up Glosa. Like you I despised the grammars, although I had to tolerate them for examination purposes. Perhaps you are not really bad at languages. You simply reject their illogicalities. Glosa has none!

You might find later that it will be very useful to get a good knowledge of French, German and Russian. If so you will find that Glosa will help a lot. All the new technical terms you will learn are all derived from Latin and especially Greek, and they are all to be found in the Glosa vocabulary. R.C

---

## RAPIDI GLOSA

Na nu-pa versi ex Amerika. Pa es u fabulo libe-tem de bi setimana. Tem ultima tetra di na pa ki a Catanuga pro famili game-ritu. Pa es poli partita; e mo de mu es u sporta in alba aqa. Na pa ki in idio bus a fluvi Ocoee; ka-co na pa habe mo horo pro garulo. Komo panto-kron mi pa dice de Glosa.

Mi ko-dice-pe es u Profesori ex Milwauki. An pa gene fo excite de Glosa; e dura qestio mi de id. U fo inteligenti andro. Po tri minuta an gene u veri idea de komo Glosa funktio. Proxi imedia an proto face plu Glosa frase.

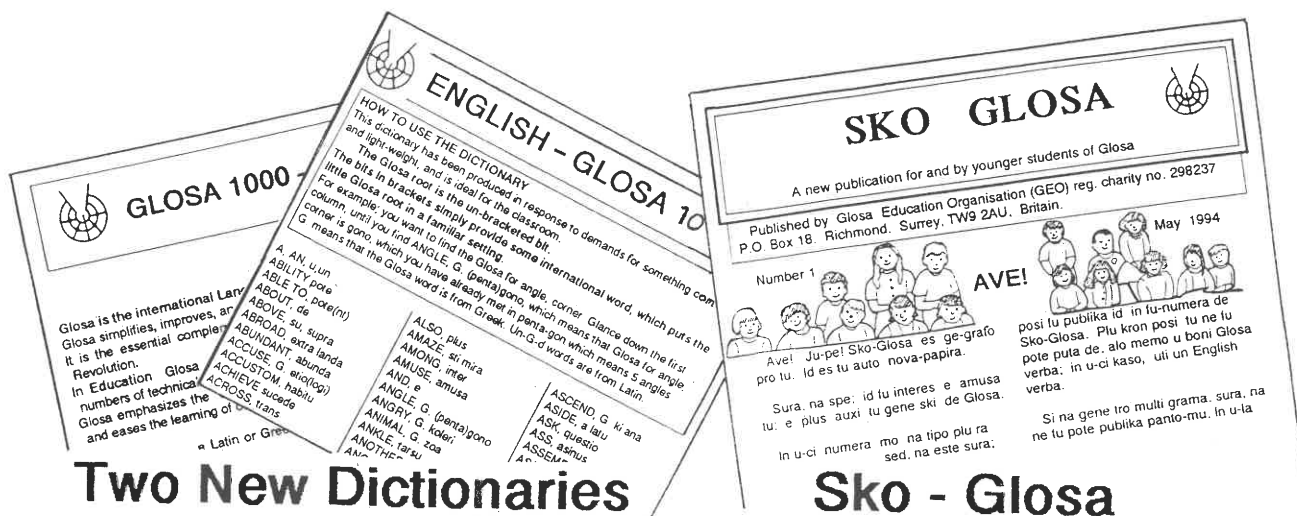

Na veni a fluvi; e gene divide ad-in oligo navi grega. Tem hemi-horo --- u kosmo de plu ciano rapidi, plu petro, aqa-kade; e mi ko spatula. Subito, un hetero navi proxi na; e un hedo voka voci; "U fluvi es fo-kali, qe?" Po bali demi-litra de fluvi aqa ex mi soma; mi pa voci 'Plus hidro!'

Po-co in hoteli, itera termo e sika; mi dona ad an u "Central Glosa" bibli. An es u fo-hedo andro. Nu mi es itera in England e mi komunika kon an per Internet puta-me reti.

Tosho,

tosho@cix.compulink.co.uk

## Two New Dictionaries

These two new dictionaries were produced chiefly for school children learning Glosa with a teacher. The dictionaries are Glosa 1000-English and English-Glosa 1000.

They contain all instructions for using the language, and are complete in themselves. These booklets are bound with only one central staple, so that the pages can be easily separated for photocopying. There is no cover, as the whole purpose of these is economy of postage and low price. Also students like to make and design their own personalized cover. They are proving to be quite popular with adults too so we are publicizing them in PGN as well as in "Sko-Glosa".

Each booklet costs 95p + 30p in Europe.  
or: 95p + 60p to all other countries.

## Sko - Glosa

A new publication for and by younger students of Glosa. Sko-Glosa is aimed at 8 to 15 year-old students. It will provide reading material, things to make and do, stimulate students to discuss and contribute articles and letters and to link with other young students who are studying or using Glosa in different countries.

Sko-Glosa contains stories, articles, poems, letters, competitions, word-games and requests for pen-friends. The first two issues of Sko-Glosa will be published in May 1994 and September 1994.

Price for the first two issues including postage £3 in Europe or £5 to all other countries.

## Evelyn Jerrard

Na nu-pa gene fo tristi nova; u Glosa-fe e boni ami de na Sa. Evelyn Jerrard subito lose bio pa setimana.

Na proto enkontra Evelyn tem 1987; e ex u-la tem fe pa ergo forti publika Glosa e don auxi a plu neo Glosa stude-pe, juve e paleo intra e extra Britain.

1989 Evelyn proto Glosa Puta-me Funda; e pa kolekti valuta e pa responde panto grama ge-nexu kon u-la funda. Gratia a poli Glosa-pe sed supra-toto gratia ad Evelyn na nu habe u fo nece IBM puta-me e Tabla Publika Sistema. Evelyn panto kron pa auxi kron na publika Glosa in plu eduka monstra in London; e ex kron a kron fe pa grafo plu artikla alo translati; qi na publika in PGN.

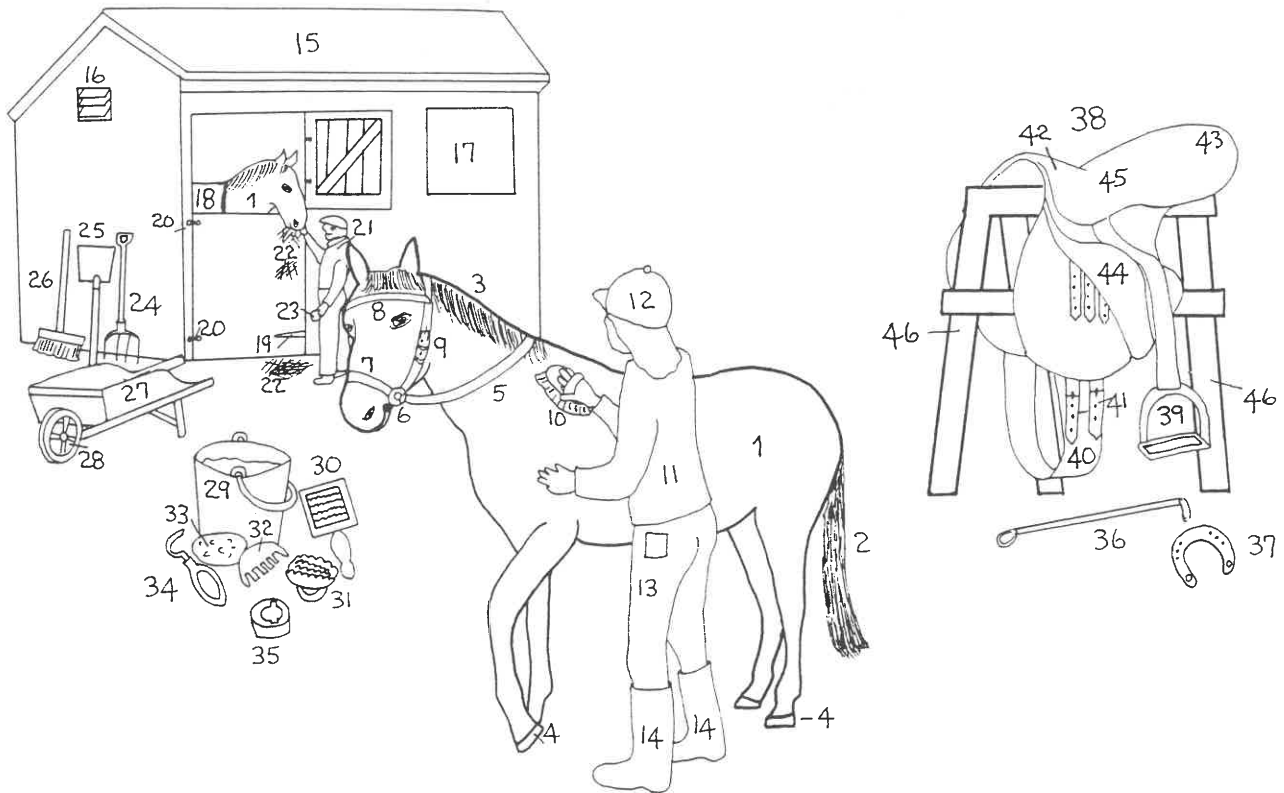

Evelyn pa es u membra de u Baha'i Fide. Fe pa proto u Glosa Baha'i Grega; e pa translati oligo Baha'i grafo-ma e preka ad-in Glosa; e fe pa distribu plu pusi Baha'i-Glosa bibli a plu ami in plu hetero landa.

Fe pa gene mega hedo ex plu Baha'i e Glosa aktivi. Ron e mi pa fru oligo hedo termo-tem di vagona ko Evelyn e fe andro Charles peri Kent rura. Fe pa es ple de energi; panto-kron hedo e fru bio. Fe pa kambio plu grama ko plu Glosa ami in poli landa. Pa meno fe pa visita Oxfordshire e pa dice de Glosa. Oligo di po-co fe pa ki in pato-do; po cirka bi-tetra horo fe pa lose bio.

Na e Glosa pa lose u fo kura, gluko e boni ami. Na bali na simpati a Charles e plu hetero membra de fe famili.

Wendy e Ron
